Racer the sporting balloon for winners

Constructed from 24 gores that provide a slim, super-smooth shape with zero horizontal stress, the Cameron Racer slips quickly up and down through the sky providing the pilot with incredible atmospheric steering capabilities.

Available in two sizes - 60 and 70 - the Racer is equipped with a parachute top. Cameron's exclusive RDS rapid deflation system is an alternative.

Calibre 2 rip-stop nylon - resistant to fungal attack and fading - is available in 19 standard colours plus silver and gold. Calibre 2 can also be dyed to meet special corporate requirements and printed to produce inspired creative effects. Hyperlast, silicone coated on both sides and which can increase envelope life by up to 50%, is optional.

Kevlar flying wires and load tapes, turning vents, and See Safe windows in the parachute are all optional.

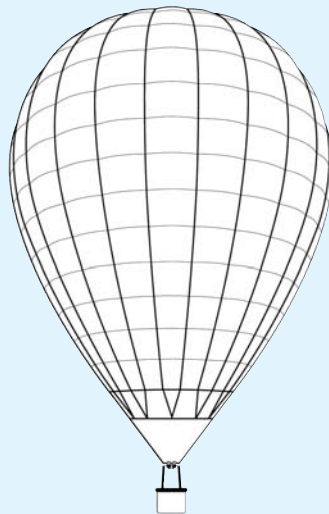

Model designation: Racer

Sizes (000 ft³/m³)

TR-60 (60/1700)
MTOM 1200 lb / 544 kg

A colouring chart for this model is available by mail, or can be downloaded from the Envelopes section of our web site at www.cameronballoons.co.uk.

Specifications are subject to change without notice.

Lighter-weight baskets in cane and willow with coloured banding to your specification are available, or you might like to consider the compact Voyager 3 which has demountable fabric walls. Suede trim is standard with leather as an alternative, again in a wide colour range.

Cameron has the widest choice of burners in the world and can offer you the perfect one to suit your flying style.

Inflation fans, radios, instruments, tethering equipment and trailers - in fact all the accessories you might want to complement your Racer - are also available.
